PHOSPHO RICH MONO CALCIUM PHOSPHATE FEED GRADE

Phospho Rich is a feed grade monocalcium phosphate. It is produced by reacting calcium carbonate with wet process defluorinated phosphoric acid. It is a source of highly available phosphorus (P) and calcium (Ca) that will help meet animal and poultry requirements for these essential nutrients.

Benefits:

- **Phospho Rich** is high in phosphorus content. Its guaranteed minimum 21% P provides flexibility and economy in formulations.
- **Phospho Rich** means high biological availability. Its monocalcium phosphate content and high solubility ensure its superior nutritional value.
- **Phospho Rich** has a narrow calcium to phosphorus ratio.
- **Phospho Rich** outstanding physical qualities provide for ease of handling and uniform dispersion in mixed feeds and minerals.
- **Phospho Rich** provides maximum economy per unit of biologically available phosphorus.
- **Phospho Rich** is available as bulk in trucks, vessel or container, and in 25kg, 50kg, and 1 mt poly bags.
